

PROGRAMS AND PRODUCTS

The following entries describe many of the Census Bureau's latest products from censuses, surveys, and other programs. Abstract numbers after the name of a product refer to relevant abstracts. (Generally, if a product was released before July 1993, it is not abstracted in this Catalog/Guide, so no abstract number is given. See the 1994 Catalog/Guide or call Customer Services, 301-457-4100, for information about such products.) The symbols following the abstract numbers refer to the product forms or media: □ printed report, ▨ microfiche, Ⓢ computer tape, 🌐 online, 📀 diskette, Ⓜ CD-ROM, and 🗺 map. Online access 🌐 is noted when one or more of the reports in a series are available, in whole or in part, on CENDATA. (See page 2 for information on CENDATA and figure 1 for a list of CENDATA contents.) Also some data are being offered online via Internet and the Census/BEA Electronic Forum (see page 2). Many publications also are offered, in whole or in part, via fax through the Census Bureau's FastFax service (see page 2).

The chart includes sections on the following subjects presented alphabetically following the General and Reference section: Agriculture, Construction, Economic—General, Economic—Outlying Areas, Foreign Trade, Geography, Governments, Housing, International, Manufactures, Mineral Industries, Population, Retail Trade, Service Industries, Transportation, and Wholesale Trade.

Within each section of this chart, such as the Population section or the Agriculture section, series are generally divided into two broad categories: (1) censuses and other information usually released at intervals of several years and (2) current programs including annual and more frequent surveys and estimates. Specific years cited are the years for which the data were collected; the date of issue may be later.
